TECHNICAL DATA SHEET

Technical Data Sheet: Graphene Oxide Gel

Product code: 060105

Revision 2026-11

Description

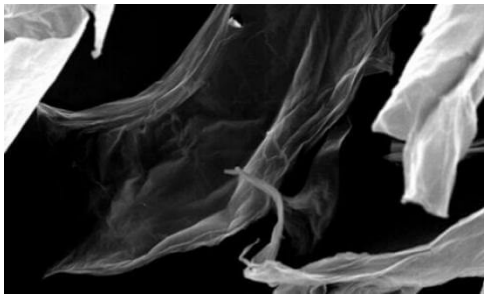

Graphene oxide (GO), graphene sheets carrying oxygen-containing groups, which makes the material hydrophilic and easy to disperse in water and polar solvents. We supply it as a powder or gel depending on the grade.

Specifications

Property	Value
Thickness	0.55-1.2nm
Layers	<3
Lateral size	0.5-3um
Purity	>99 wt%
Appearance	Brown

Characterization

Representative image of this grade is shown below. A representative Certificate of Analysis is available.

Representative image

Applications

Our graphene oxide is used in membranes, coatings, composites, sensors and as a precursor for reduced graphene oxide.

Storage and Handling

Store sealed, dry, at room temperature. Use respiratory protection when handling dry powder; see SDS.

Documentation

Representative data provided. A representative Certificate of Analysis is available. Safety Data Sheet at cheaptubes.com/nanomaterial-msds-safety-sheets.

Application results depend on formulation, equipment and process conditions; confirm with your own trials. Specifications reflect the product page at cheaptubes.com as of November 2026.
